

Coronavirus – COVID 19 Policy Statement

Goldwing Cable Limited are committed to the highest levels of health and safety for the protection of our employees, customers and wider communities. Since the outbreak of Coronavirus we have given out information to our staff from government guidelines, including regular hand washing and cleaning of frequently touched surfaces, to prevent infection and reduce the risk of anyone having to stay at home. We are situated within a rural environment (Suffolk has had only one case confirmed) and so have limited exposure to the virus. However, we are not complacent and by introducing the government guidance we hope to minimise any disruptions to our workforce and, therefore, supply of cable.

We generally hold 3 months' stock and measures have been put in place to increase levels whilst we trade through this crisis.

Products sourced from China initially had a 3 to 4 week delay following the virus outbreak and extended Chinese New Year, but are now up and running with minimal delays.

Products sourced from Italy as yet have had no delays in supply and we are in constant communication with the factories should the situation change. Orders have been placed with alternative suppliers for these products.

We remain fully committed to support your business through these challenging times and will keep you informed should any of these circumstances change.
